INTRODUCTION

Clients of law firms frequently face with a variety of difficulties when dealing with a case, for example, they are ideally uninformed about the case requirements and hearings and hence have to deal with a lot until a case is adjourned. A virtual advocate client management software thereby, has multiple purposes which will help enhance efficiency, time, communication, keeps an ideal record of the documents provided by the client and after a case adjourns keeps record of the case files and many more.

SmartJudy is such a software which streamlines and aims primarily on client satisfaction. We are creating the software so that clients can easily communicate with advocates, seeking proper advice/information about the case, will be informed about the case hearings and can be entrusted with safety of client information. SmartJudy is user-friendly. Clients having little to no knowledge of using such softwares will be guided and provided proper instructions.

PROBLEM STATEMENT

The aim of this work is to develop an advocate client management software that can assign cases to junior advocates via the senior advocate, schedule case hearings and keep a record of all the finished case files completed through the software.

APPLICATIONS

- Client Management: SmartJudy provides a centralized dashboard where law firm professionals can efficiently manage their clients' information. It allows advocates to create and maintain a comprehensive database of client details, including personal information, case history, and communication records.
- Case Tracking and Management: SmartJudy includes features for tracking and managing cases within the law firm. It allows advocates to monitor important case details, deadlines, and activities directly from the dashboard.
- Document Management: SmartJudy offers a robust document management system, allowing law firm professionals to securely store, organize, and retrieve legal documents associated with clients and cases.

CHALLENGES

- Complex Legal Workflows: Law firms have intricate and varied workflows, making it challenging to design a software solution that accommodates diverse legal processes and practices.
- Data Security and Privacy: Law firms deal with sensitive client information and confidential legal documents.
- Integration with Existing Systems: Law firms may already have existing software systems for case management, document management, or billing.

FUNCTIONALITIES

Functionalities available :

1. User Registration and Authentication: Allow users (Advocates, Junior Advocates, and Clients) to register and authenticate themselves to access the system securely.
2. Client Management: Enable Advocates and Junior Advocates to create, view, and manage client information, including personal details, contact information, and case history.
3. Case Management: Provide functionality for creating, tracking, and managing cases, including case details, deadlines, status updates, and case-related documents.
4. Document Management: Allow users to upload, organize, and manage legal documents associated with clients and cases, including version control, document categorization, and secure storage.

FUNCTIONALITIES

5. Task Assignment and Collaboration: Enable Advocates and Junior Advocates to assign tasks, set deadlines, and collaborate with each other on case-related activities, facilitating effective teamwork and communication.
6. Document Sharing with Clients: Provide a secure mechanism for sharing case-related documents with clients, allowing them to view and download necessary files, ensuring transparency and effective client communication.
7. Deadline and Calendar Management: Incorporate a calendar feature to track important deadlines, court dates, and meetings, providing reminders and notifications to users to ensure timely actions.

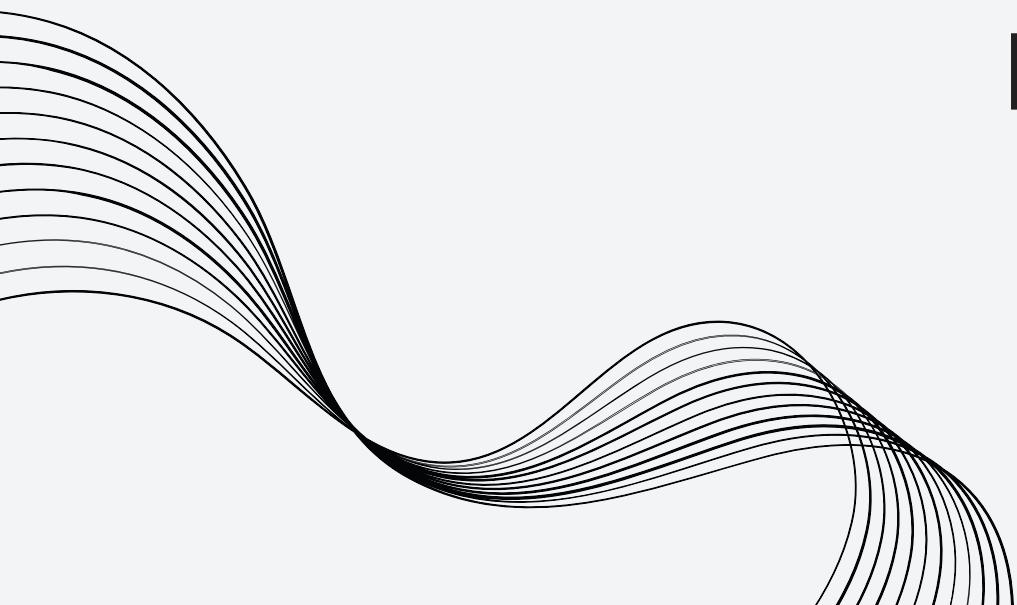

MODULES

1. Admin
-login
-change password
-view/delete users
-add users

2. Senior Advocate
-assign tasks to junior advocates
-take relevant cases
-schedule case hearings

3. Junior Advocate
-advocate cases
-discuss with the clients about the case matters directly

4. Clients
-reports case details
-uploads documents
-can directly communicate with the junior advocates

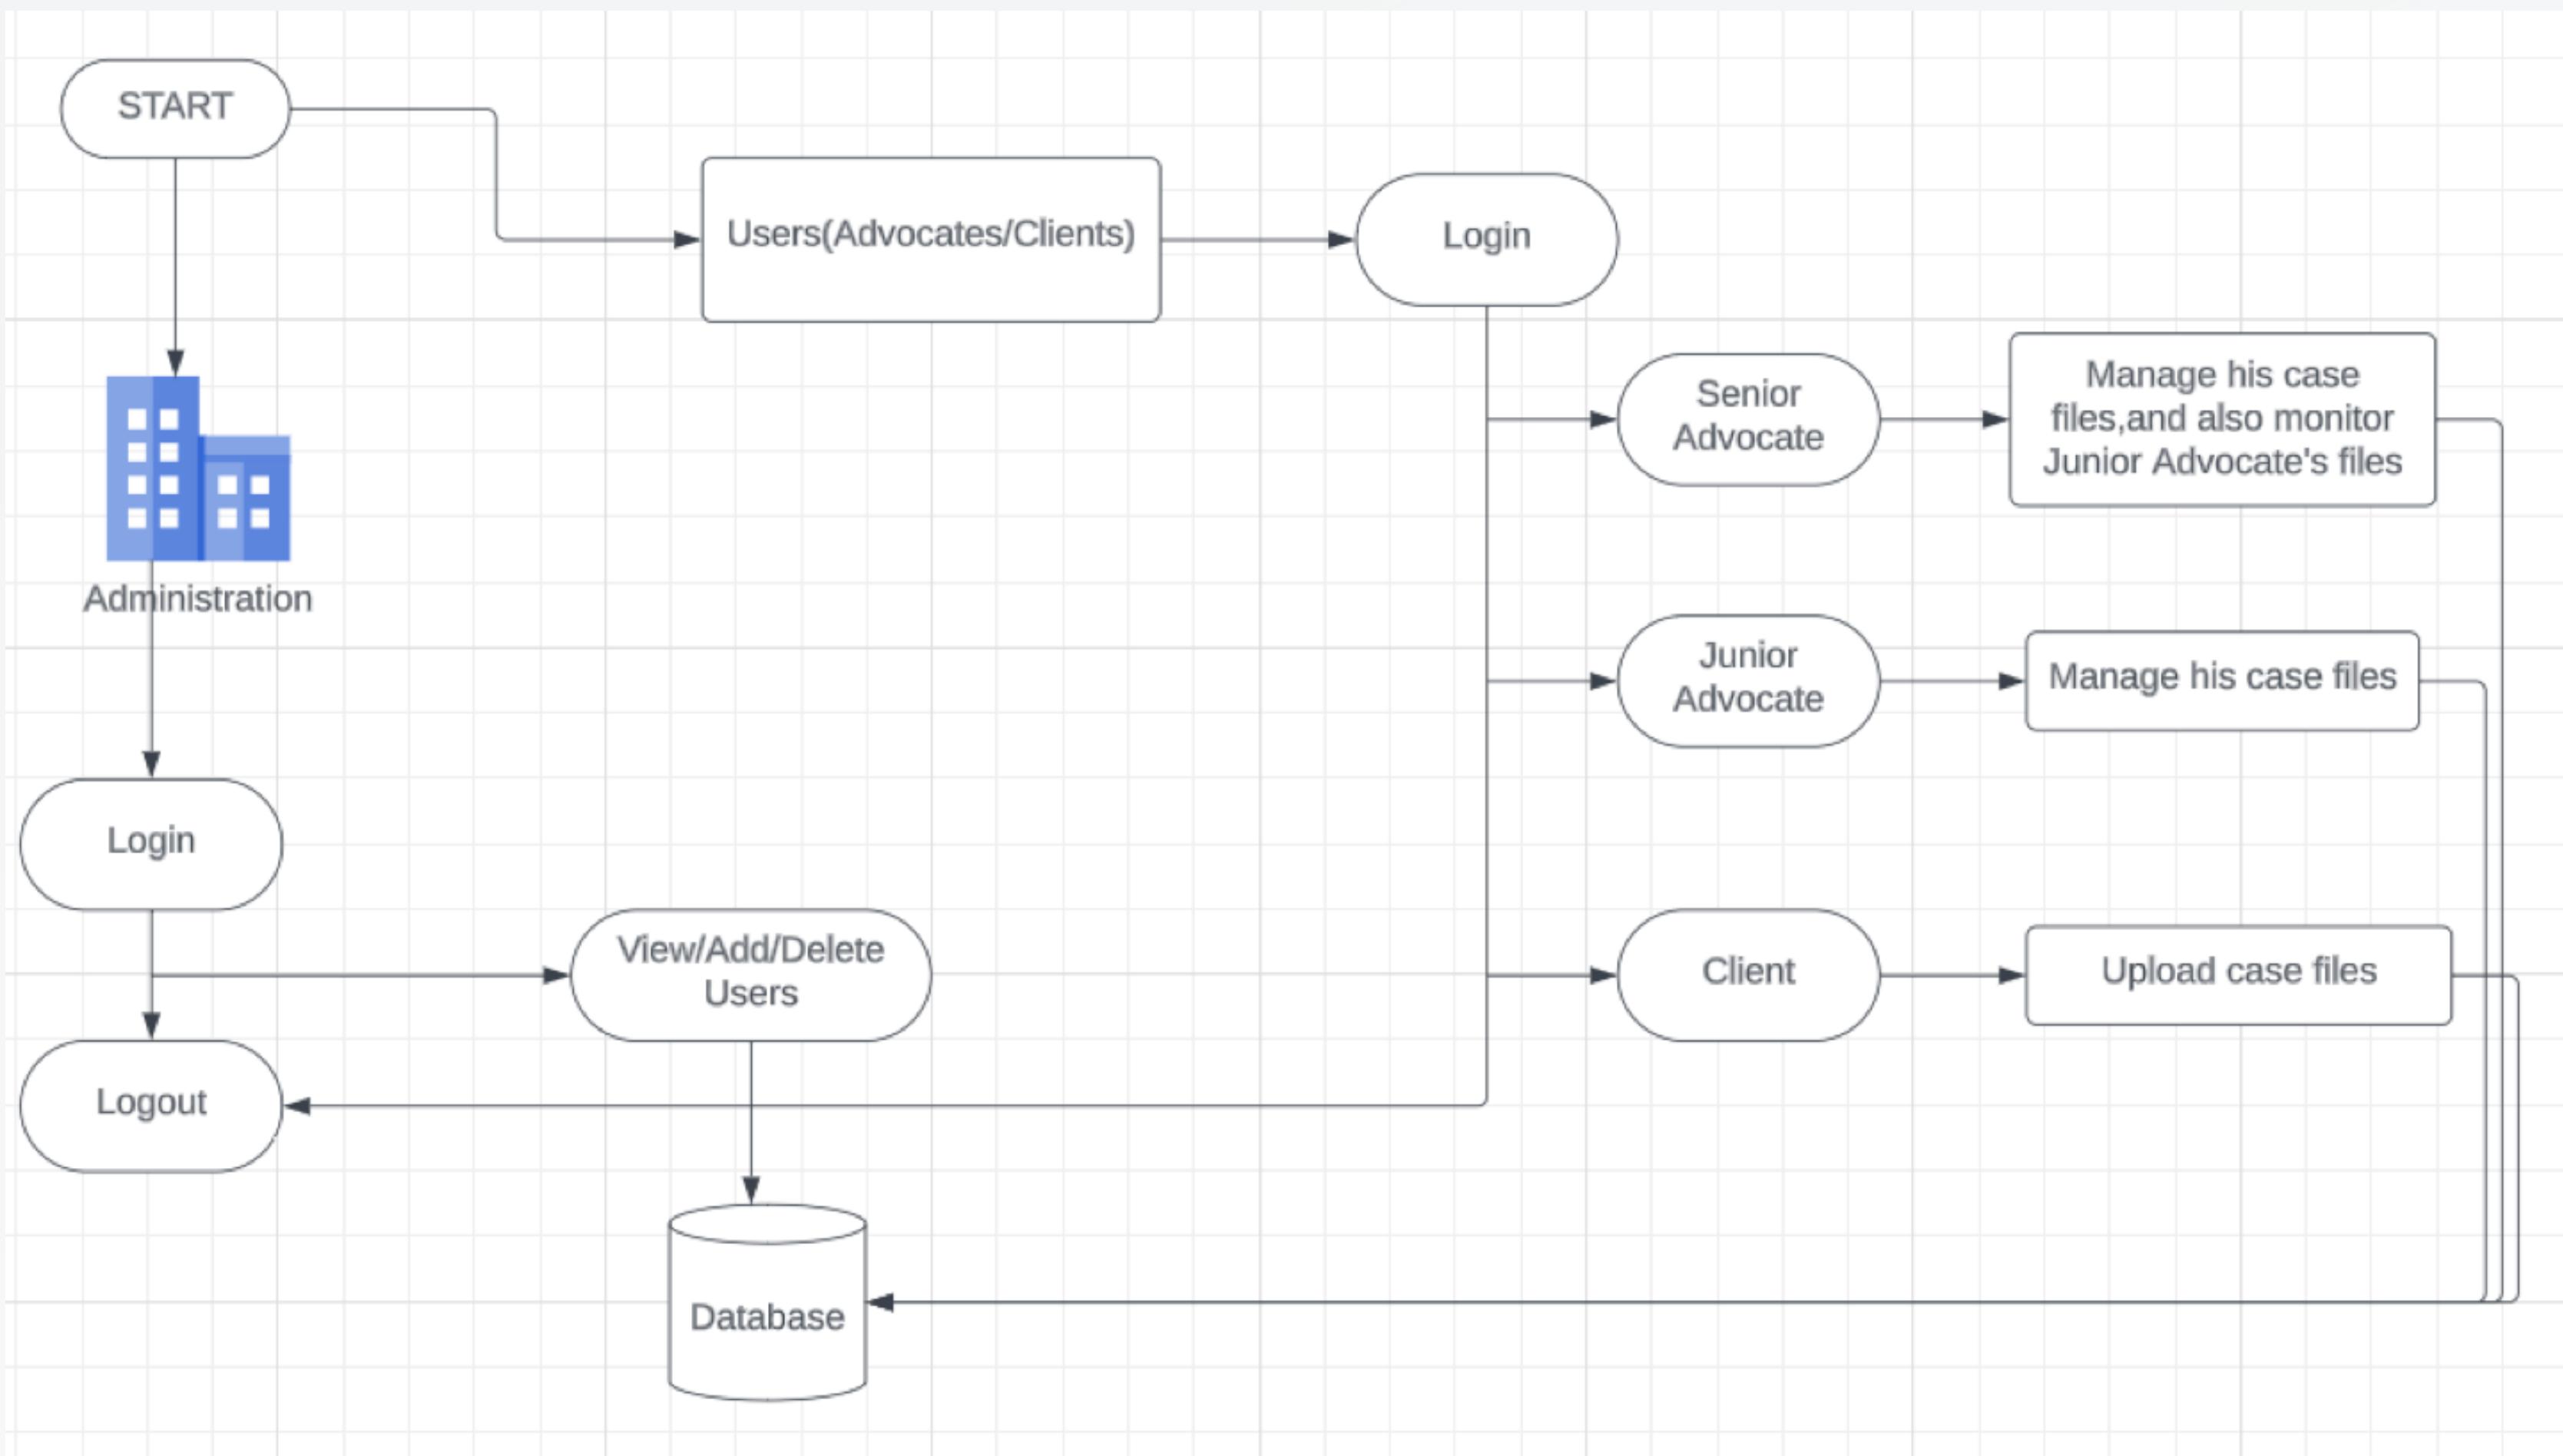

LITERATURE REVIEW

1.Clio

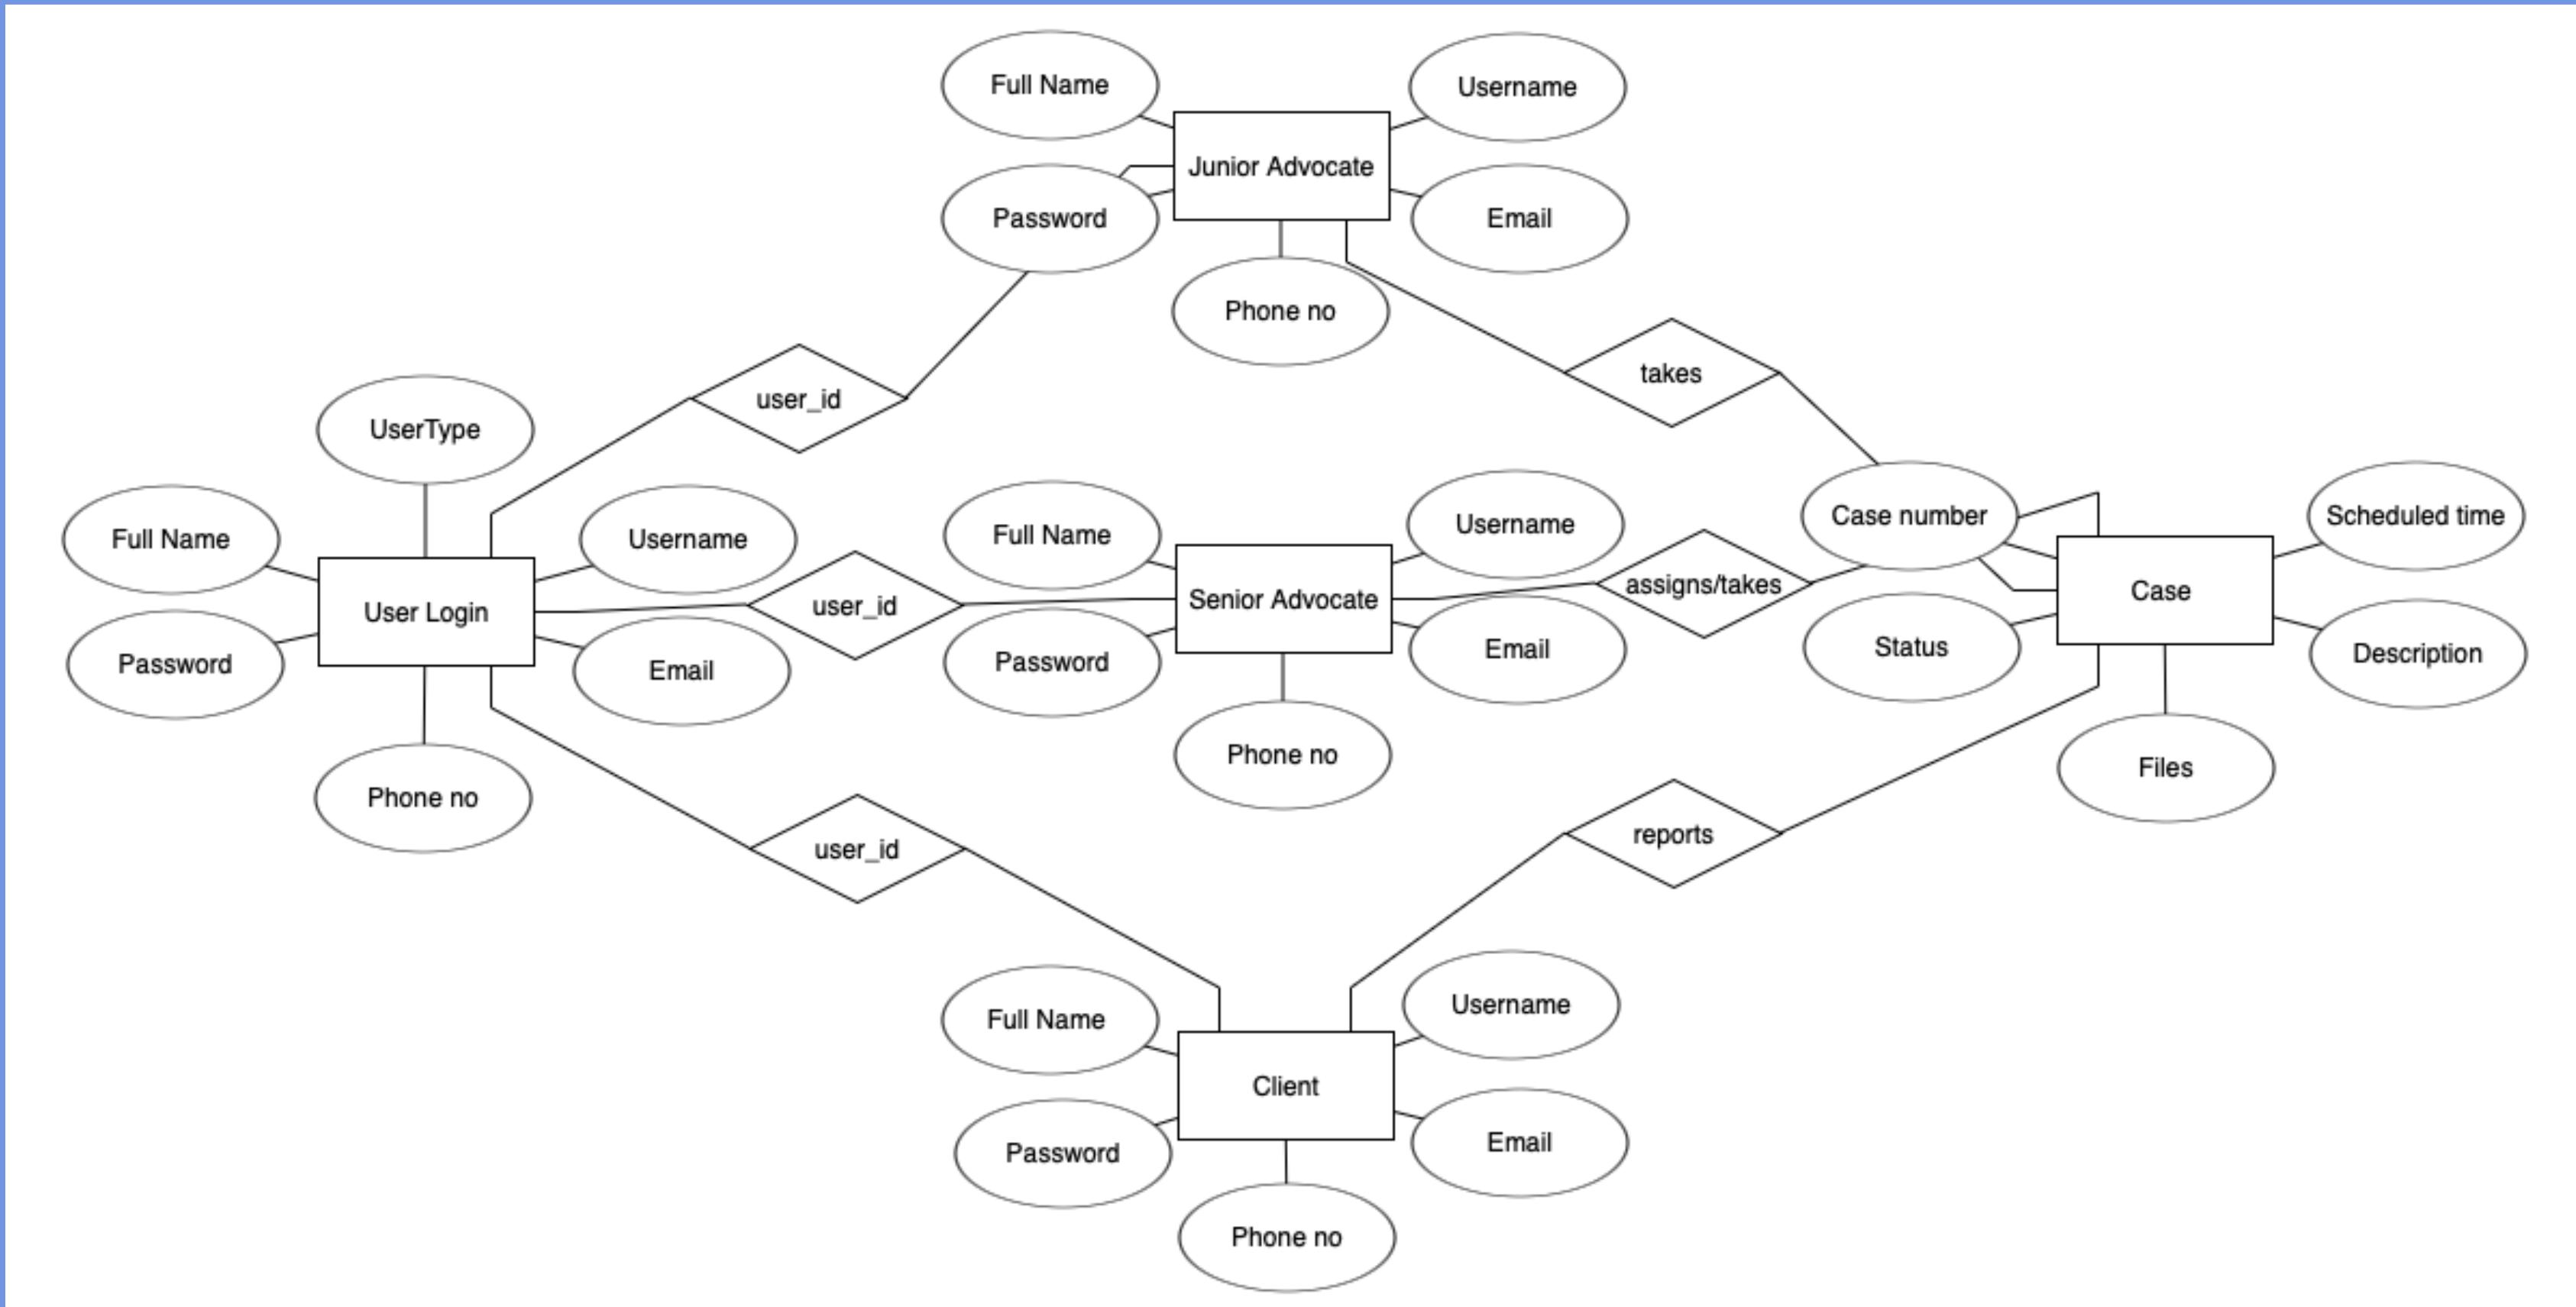

Manage your law firm from home with Clio – G2's favorite legal case management solution. Clio clearly stands above the rest with the most 5-star reviews. Keep all your cases, contacts, bills, calendars, and more organized in one place. With unlimited document storage and the ability to access case details from anywhere, a solution like this will be your law firm's critical hub when working remotely. Schedule a demo today to learn more. The Clio Suite is comprised of two components: Clio Manage: The industry's #1 cloud-based legal case management software. Clio Grow: Powerful client intake for law firms—simplified. The complete client intake and client relationship management (CRM) platform that streamlines processes, organization, and law firm growth.

2.MyCase is a complete case management solution for your law firm, providing the tools you need to improve organization, increase efficiency, and scale your firm operations. With MyCase, all of your important case details – documents, contacts, calendars, emails, tasks, invoices – are available in a single, organized location.
